

# EFFICIENCY + SPACE SAVINGS

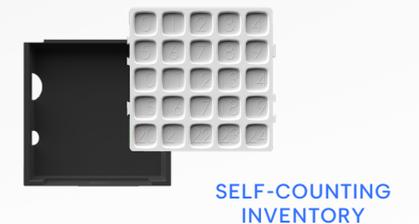

When you choose Calyx Containers as your packaging partner, you're picking the most reliable, sustainable choice. You're also choosing efficiency, because that's what we're all about.

So, just how much space will you save by switching to our unique square containers? See for yourself, and then do the math on how those space savings will help you whittle down labor costs, storage, shipping fees, and more.

## IMPRESSIVE INVENTORY MANAGEMENT

Our patented trays and inserts are numbered to make inventory and reconciliation a breeze. We have a variety of modular inserts to allow for variable capacity within the same footprint.

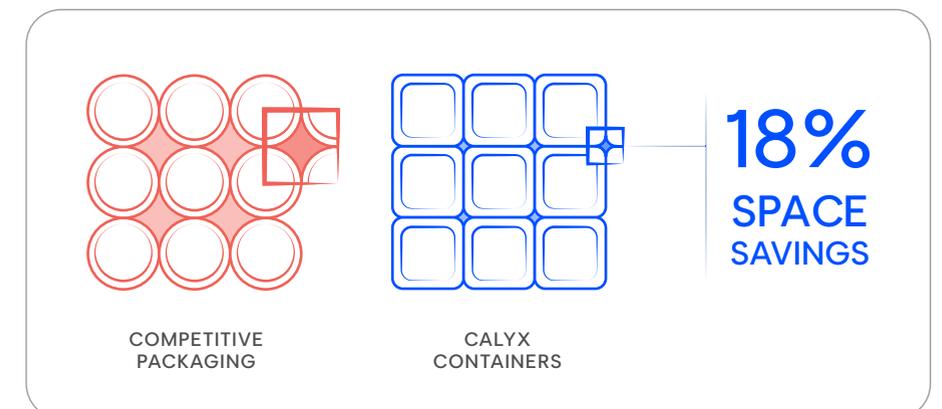

## REUSABLE TRAYS

Not only does our unique square inventory management system pack and ship better both to your facility and en route to retail, but our trays and inserts are reusable and recyclable, eliminating the need for non-recyclable shipping and storage materials.

## SQUARE IS WHERE IT'S AT

Our square inventory management system means approximately 18% less wasted space, meaning more room for your operations and a bigger bottom line.

# SEE HOW CALYX STACKS UP

Compare your current packaging specs to ours  
to see where space savings can turn to cost savings for you.
